EDIBLE EDUCATION

A FARM TO SCHOOL WORKSHOP
FOR K-5 EDUCATORS

Learn to integrate **gardening and cooking activities** into the elementary school classroom to provide hands-on, exploratory learning opportunities.

During this fun, hands-on workshop, teachers will:

- **Participate in model lessons** that address science, social studies, math, reading, and writing standards across grade levels
- **Explore farm to school** resources
- **Brainstorm with fellow educators** implementation strategies for each unique school setting

Teachers will leave this workshop with **the knowledge, skills, and resources** they need to begin implementing farm to school lessons in their classroom.

Open to all educators and staff in districts that applied for a 2016 Golden Radish Award

This workshop is coordinated by Georgia Organics and led by Jenna Mobley, a veteran K-5 public school teacher and farm to school consultant.

Space is limited.
