

SMOOTH MOVE

Want the smoothie minus the seeds? The Smoothie Press is your on-the-go smoothie solution for a seedless smoothie. Blend, strain and go all in one shot. After blending your ingredients in any blender, pour them into your Smoothie Press, then push down on the plunger to strain your smoothie. When you get to the bottom, the seeds stay trapped below the mesh and you can now enjoy a virtually seedless smoothie.

The Smoothie Press tumbler also fits on the Magic Bullet blender. Just put your smoothie ingredients into the tumbler, secure it to the Magic Bullet blender base and blend. After blending, simply screw on your Smoothie Press lid, press down to de-seed and enjoy.

Fun facts about the Smoothie Press:
