

Interagency Refinery Task Force

Refinery Safety Forum

Community residents, refinery employees, consultants, regulators, advocates and other interested parties are invited to attend this informational and interactive session.

The Interagency Refinery Task Force periodically holds refinery safety forums to encourage open discussion among all interested parties including industry, labor, area residents, community groups, environmental groups and regulators.

The IRTF shares best practices, examines performance metrics, analyzes causes of incidents and other issues, as described in the task force's guiding document: "Improving Public and Worker Safety at Oil Refineries" published in February 2014.

Governor Edmund G. Brown Jr. created the Interagency Refinery Task Force in 2013 to facilitate statewide coordination among member agencies that help protect the public, nearby communities and refinery workers from risks associated with refinery operations throughout the state. CalEPA coordinates the task force among local, state and federal agencies.

* Speakers subject to change

April 23, 2018 ♦ 6-8 p.m.

Torrance Library Meeting Room

3301 Torrance Blvd., Torrance, CA 90503
