

Free Walk-In COVID-19 Community Testing Pop-up Events!

Are you interested in screening yourself for COVID-19 before, during, or after your spring travels or social gatherings with friends and family?

Getting tested before and after an event can prevent you from unknowingly spreading COVID-19 to others.

When you test and isolate if you are positive, you protect your loved ones, including our youngest community members who haven't had a chance to be vaccinated, as well as those at greater risk for severe outcomes due to underlying health conditions.

**When: March 24, March 31, and April 7
from noon to 5 p.m.**

Where: Cook County Community Center

Who: All community members welcome

A variety of tests will be available:

- Rapid antigen tests (to take home and use at your convenience)
- Rapid molecular tests
- PCR tests (saliva-based)
