A beginner's guide to fall planting and maintenance

Spring and summer are perhaps the busiest times of year for gardeners. However, fall also is a prime time to tend to gardens.

The tree and bare root retailer Bower & Branch advises that soil temperatures in many regions of the country may still be warm enough to encourage root growth well into the start of winter. Furthermore, fall is often the ideal time to plant, fertilize and keep a garden going or to get a head start on next year's bounty.

Here are some tips to make the most of the fall gardening season.

- Think about fall annuals and bulb planting. Near the end of September, start planting cool-weather-loving pansies and violas for pops of color as summer flowers fade. Also, it's a good idea to stock up on bulbs that will bloom in the months to come before they sell out in stores. Wait until the temperatures really cool down before planting them in desired spots for spring sprouts.

- Sow salad seeds. Lettuce, spinach, radishes, and arugula tolerate cooler temperatures. Try new and interesting lettuce varieties and enjoy salads well into the fall season.
- Take inventory of the sun. Positioning a garden carefully means maximizing hours of sunlight, which begin to dwindle in the fall. Experts say gardens grow best in sunny locations that receive six hours of direct sunlight each day. This is where container gardens can be helpful, as they allow gardeners to move plants into spots that will get ample sunlight.
- Fill in landscaping gaps. Some fall plants can add color around the landscape and brighten up homes to add curb appeal. In addition to pansies and violas, asters, kale and chrysanthemums are fall blooms. Keep in mind that mums can come back year after year.

So take them out of those flower pots and get them into the ground. They can be enjoyed next year as well, sprouting in early spring and developing leaves and buds through late summer.

- Clean up unwanted growth. Fall is an ideal time to cut back spent vegetable plants and get rid of errant weeds. Rather than bagging leaves, mow them with a grass catcher and then add the

mix to a vegetable garden as an excellent soil insulator. The nitrogen and carbon will fertilize the soil, enhancing growing possibilities and limiting weed growth.

- Propagate plants in the fall. As temperatures gradually begin to cool, start taking cuttings from perennials, gathering seed pods from azaleas and rhododendrons and dividing hardwood cuttings, says the resource Gardening Know How. Consult with a garden center or horticulturist on the proper ways to propagate stems using rooting hormone and other techniques.
- Continue to water plants. Water is essential in the fall and winter as roots can still be growing. Gradually reduce watering duration as plants go dormant.

Fall planting and maintenance can extend gardening season and improve the chances of growing a healthy spring garden.

ONE CALL SENDS A ROOFER, NOT A SALESMAN

Robert Roofing & Gutters, Inc. is a second-generation company based in Norfolk. It is a full-service roofing and home improvement company that provides free estimates and affordable solutions to your roofing, gutters, siding, and window needs.

Robert “Rob” Greene founded the company in 1980 and runs it today with his son Robert Jr. “Robbie.” Their goal is to provide top-notch workmanship at an affordable price.

“I decided to start my own business after I noticed that homeowners were being charged very high prices for a mediocre job,” says Rob. “This bothered me. I knew that if I could offer customers an exceptional job with fair pricing, that I could make a difference.”

Rob himself started roofing at the age of 13 with his father for his father’s construction company. Rob learned everything about roofing from the “great old-timers” who were up on the roof working right along with Rob, teaching him everything he now knows.

Today, Robert Roofing is fully licensed and insured, and performs work on residential and commercial buildings plus new construction. They have an “amazing crew” that offers various types of roofing (asphalt, rubber, low-slope, specialty shingles, etc.) as well as other services including gutter installation, new downspouts, vinyl and wood siding, coil stock metal coverage, soffits, and chimney repointing and flashing.

Did you know fall is peak roofing season? Rob says it is

Business spotlight

very important to have your roof evaluated before the cold winter months. If you need a new roof, or roof repairs, now is the time to do it.

“It’s easy to brush off some minor wear and tear water damage or damaged shingles but these are strong indicators that you need to replace your roof.

“Robert Roofing and Gutters is everything you want a contractor to be: Honest, reasonably priced, expert in what he is doing. Nothing flashy, just good work.”

David Williams

Don’t wait until spring to replace your roof, as doing so can exacerbate your problems. Any damage that you’ve discovered can only get worse during the winter with freezing rain, ice, snow and sleet. It’s best to be proactive instead of dealing with emergency roof repairs at the last minute.”

Robert Roofing will try their best to restore your roof and not sell you a new one. But if you need a new roof, their expert installers will make sure the job is done right the first time.

For the warmer months, Rob stresses the importance of roof ventilation which can also help with energy savings.

“The proper roof ventilation allows proper airflow between the attic and the outdoors. If a roof isn’t properly ventilated, hot air can become trapped inside the attic and cause your entire house to heat up gradually like any oven. This puts a huge strain on your home’s cooling system and leads to a noticeable rise in your monthly energy bills.”

For a full list of services available, visit www.robertroofingandgutters.com or call 857-247-8709 where you can also arrange a free estimate with Rob.

Under Pressure gets homes ready for the holiday season

By CHRISTIE VOGT
CONTRIBUTING WRITER

In anticipation of fall bonfires, winter holiday gatherings and cold weather challenges, exterior cleaning company Under Pressure is busy preparing and sprucing up homes for the season. “The work we do is like a tune-up of the house from top to bottom, from roofs to gutters to windows to patios,” says owner Mark Mercer. “We’re helping people to love their home again, especially around the holidays, and to refocus attention on the importance of the health of a house.”

Mercer says that cleaning exteriors in late summer and early fall is an optimal time because houses stay cleaner for longer due to less pollen, landscaping debris and humidity-induced mildew. Under Pressure is also able to wash surfaces later in the year — even as temperatures drop to the 30s — thanks to water heating mechanisms in its trucks. “Winter is long, and homeowners should be asking themselves at this time whether their house is prepared for the

Business spotlight

changing weather ahead,” Mercer says.

In addition to washing, Under Pressure offers shrink-wrapping to protect outdoor furniture, water features, garden monuments and other items that need to be shielded from the elements. “Shrink-wrapping is a great alternative to covering things with weatherproof fabric, which often gets chewed through by critters,” Mercer says. “Shrink-wrapping also saves space because we can push everything into one tight bundle in your yard rather than having your patio furniture take up square footage in your garage or basement.”

Under Pressure also offers safe and efficient ice dam and snow removal services. Its gentle but powerful steam method quickly remedies problematic areas on roofs without damaging a home’s structure.

Routine maintenance and cleaning services like these are important, but Under Pressure is also eager to bring a bit of magic to customers this year in the form of custom-designed holiday lighting. “We are really excited about this new offering,”

Mercer says. “It’s amazing what you can do with a home nowadays with new light technologies, and customers have been asking us for years for a service like this.”

Under Pressure’s team has gone through weeks of training and safety courses in order to design and install holiday lights that cater to customers’ imaginations. “The designs are only limited by homeowners’ creativity,” Mercer says. The company uses LED lights and can illuminate an entire house with one extension cord and a timer. Homeowners don’t have to worry about maintenance or storage either; Under Pressure

will take the lights down at the end of the season and store the equipment until homeowners want to reinstall a display in the coming year.

“We can decorate homes for Halloween, Christmas, Hanukkah, New Years — any winter holiday that people want to celebrate,” Mercer says. “Holiday lighting creates a special feeling; there’s just something about the warmth that it brings to a place.”

Fireplace trends help create attractive, comfortable rooms

Fireplaces are useful features in a home. Fireplaces are sources of ambient heat and also add style to indoor spaces.

Fireplaces can complement just about any interior style. Fireplaces can be traditional and burn wood or connect to a home's natural gas supply for on-demand ambiance. What's more, fireplaces may come in vented or ventless varieties, depending on homeowners' preferences and what is allowed by community building codes. That means a chimney or flue may not be needed — expanding the list of rooms where a fireplace can be installed.

Certain trends have emerged among fireplace fans in recent years. Here's a look at what's getting consumers fired up about these home decor elements.

- **Minimalist style:** Many fireplaces are designed in neutral colors with minimal trim that directs focus on the fire and not the appliance. When the fireplace is not in use, it blends in with surroundings and will not compete for attention with other design elements.

- **Convertible fireplaces:** Homeowners can choose between open or sealed fireplaces. A convertible fireplace enables homeowners to

have the best features of these options. A convertible fireplace can be converted to wood from gas, or the opposite, in as little as 30 minutes.

- **Nature-inspired materials:** Natural stone continues to be a material of choice in fireplace surrounds. Light colors work well for a fireplace, and also fit with today's lighter color interior design preferences. Natural stone also works perfectly with both contemporary and rustic decor.

- **Vintage fireplaces:** Vintage continues to be a buzzword in 2022, and the choice to go vintage also applies to fireplace styles. A room decorated in vintage elements can be complemented with a vintage fireplace or one designed to look vintage.

- **Integrate into wall decor:** Fireplaces that are built right into a wall save space. One can have a television and a fireplace on the same wall. These types of fireplaces work well in modern home designs. Other fireplaces may be built into bookshelves or other wall features.

Fireplaces can improve the appeal of a home. Various trends are popular this year, making fireplaces highly coveted features.

Wood floor installation dos and don'ts

Jaw-dropping features can sell a home in a heartbeat. A penthouse apartment with floor-to-ceiling windows and a panoramic view of a city skyline likely won't prove a hard sell, nor will a home with an infinity pool overlooking a landscape of rolling hills. As awe-inspiring as such features can be, some more subtle components, such as authentic hardwood floors, also can do much to make a home more appealing to prospective buyers.

home renovation experts at BobVila.com, squeaky floors could be an indication that the subfloor has begun to warp or twist. Sinking floors are another indicator of deteriorating subfloors. Subfloors should be somewhat level before new hardwoods are installed, so DIYers should inspect and address subfloor issues before installing new flooring.

DO expose wood flooring to the elements in your home prior to installation. The home im-

Hardwood flooring is a sought-after commodity. Data from the National Association of Realtors indicates that 54 percent of home buyers are willing to pay more for hardwood floors. In fact, NAR figures indicate that 28 percent of buyers between the ages of 35 and 54 consider hardwood floors "very important" when looking for a home. Homeowners who are considering selling their homes, or those who simply want to upgrade their existing flooring, may want to consider installing hardwood flooring. Though it's a project best left to professionals, hardwood flooring can be installed by skilled DIYers. In such instances, homeowners may want to keep these dos and don'ts in mind.

provement resource BuildDirect recommends acclimating hardwoods to the space where they will be installed. Skipping this important step could result in gaps during the winter and cupping over the summer. To acclimate hardwoods, open the boxes and spread them out for about a week while running the air conditioner or heater at normal levels. When storing hardwoods prior to installation, avoid keeping them in potentially moist areas like a basement.

DO hire a professional if you have limited or no DIY flooring experience. Hardwood flooring installation is not generally a project for novice DIYers. Hardwood flooring projects may present some common challenges, but no two homes are the same. So unless they have prior experience installing floors in multiple rooms or homes, homeowners may save themselves time, trouble and a significant amount of money hiring a professional to do the job.

DON'T skimp on tools. A DIY hardwood flooring installation might be less expensive than hiring a professional, but homeowners should resist any temptation to increase those savings further by purchasing less costly tools or fewer tools than is necessary to complete the job. BuildDirect notes that DIYers will need at least a miter saw, table saw, cleat-nailer or stapler, finish nailer, compressor, jamb saw, chalk line, nail set, and tape measurer when installing hardwood floors. Purchase all necessary tools and read product reviews to ensure each tool is up to the task.

DON'T ignore the subfloor. New hardwoods won't erase the problem of subfloors in poor condition. According to the

Wood floors can be awe-inspiring. Some homeowners can install such flooring on their own, and the project can be much easier if they learn as much about installation as possible prior to beginning the project.

Signs your gutters are in need of repair

Fall is a great time to tackle projects around the house. The weather each fall allows homeowners to make improvements to their homes' exteriors without worrying about extreme heat or cold, while interior projects like painting are made easier because homeowners can open the windows to allow for proper ventilation.

Fall also marks a great time to prepare for upcoming projects that can make winter work that much easier. For example, fall is a great time to take stock of your gutters so you can address any issues before leaves begin to fall or the first snowstorm touches down. Compromised gutters can contribute to water issues in basements and adversely affect a home's foundation if not addressed immediately, so it behooves homeowners to learn the signs that gutters are in need of repair or replacement.

- Gutter hanging off the home: Gutters were once installed predominantly with spikes. However, many industry professionals now install gutters with hanger brackets. Why

the change? Spikes loosen over time, leading to the gutters hanging off the home. That can contribute to serious issues if left untreated. Gutters hanging off the home need not necessarily be replaced, but rather secured to the home, ideally with hanger brackets instead of spikes. Brackets hook into the front of the gutter and are then screwed into the fascia of a home. A professional who specializes in gutter repair can perform this task relatively quickly, and it's an inexpensive yet highly effective solution.

- Gutter separation: Gutters that are no longer fastened together can leak and contribute to issues that affect the home's foundation, siding and appearance. Clogs and the accumulation of debris can cause gutters to separate because they are not designed to hold too much weight. Replacement of separated gutters may or may not be necessary depending on how big the problem is and the condition of the existing gutters. If

replacement is not necessary, separated gutters may be remedied by securing the joints, another relatively simple and inexpensive fix.

- Peeling exterior paint: Paint that appears to be peeling off of your home may indicate that water is seeping over the edge of the gutter closest to your home. When that happens, water is coming down the side of the house, causing the paint to peel. In such instances, replacing the gutters is often necessary.
- Basement flooding: Not all signs of deteriorating gutters are outside a home. Many a homeowner has been flummoxed by flooding in their basements, and such flooding can be caused by aging, ineffective gutters. That's because deteriorating gutters sometimes allow water to leak near the foundation of a home, contributing to basement flooding.

Fall is an ideal time to inspect gutters and have any issues fixed before leaves begin to fall or harsh winter weather arrives.
